## Club Car Connect for Commercial Fleet

### The Product Family

Club Car Connect for Commercial vehicles is our best in class golf and utility cars with integrated technology that reduces operating costs and mitigates risk. This program has been implemented at over 1,500 golf courses in 50 countries. In 2019 we launched the commercial edition of Club Car Connect which still delivers the same impressive results and has additional fleet and employee management features designed for a wide range of commercial applications.

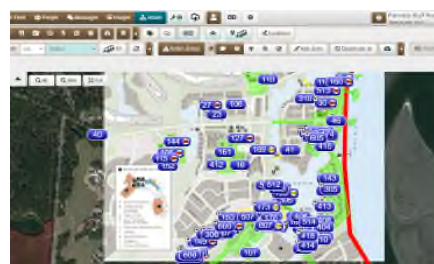

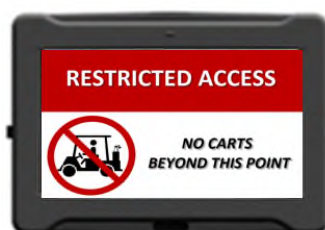

The program consists of one proprietary, built for purpose screen option and a non-screen GPS option. The supporting software features include a base package of modules and an optional add-on module so that you can select the features that meet your organization's needs.

XLT 10.2" Screen Unit

FT+ Screen-less Unit

Both GPS unit options are primarily a field install options meaning the vehicles would be ordered as normal and all the units and install hardware would be shipped and installed on-site (customer site or dealer site.)
