Date Program was Initiated: 2010

What time period does this program run: All Year

Provide program description: Kansas City CARE Clinic dba KC CARE Health Center (KC CARE) provides low-cost, high-quality medical and oral health services to Jackson County, MO residents who are uninsured, underinsured, or would otherwise struggle to access and afford healthcare. The following core activities summarize the purpose of the Primary Care Program: - Providing direct medical services for underserved patients, utilizing staff and volunteer providers, students, and support staff. Volunteer professionals and students significantly increase our capacity. - Improving patient self-management of chronic conditions through health education and medical intervention, as verified by patient achievement of medically recognized standards for control of those conditions. - Facilitating access to free and low-cost medications for patients, as prescribed. To improve access to medication and medication management, KC CARE has an onsite pharmacy. Medical services include: - Primary care for adults, seniors, and children - Care for chronic conditions such as diabetes, hypertension, asthma, and hyperlipidemia - Care for acute conditions such as illness and injury - Physical exams - Pharmacy services - Women's health services - Vaccines for children and adults - Health and wellness screenings - TB, HIV, and STD testing - Hepatitis C testing and treatment - PrEP therapy for HIV prevention - Medical social work - Chiropractic services In addition, volunteers provide numerous services (some of which can be difficult for patients to otherwise access) including dietary management and nutrition, diabetes management, medication adherence, dermatology, cardiology, transgender clinics, optometry, pulmonary care, and smoking cessation. KC CARE runs a full-service pharmacy at our Midtown location, enabling us to provide more assistance with and oversight of medications including increased education and treatment adherence support to improve patient health and safety. KC CARE's Oral Health program offers diagnostic, restorative, emergency, and preventive dental care. Procedures include comprehensive oral exams, X-rays, extractions, fillings, prophylaxis, and routine cleanings.

Describe the benefits of this program to Jackson County Missouri: Since 1971, KC CARE Health Center has offered and increased community access to primary care and dental services to residents of Jackson County and beyond. Our emphasis is on low-income individuals at or below 200% of the federal poverty level (FPL). These populations tend to face health disparities, chronic disease, and mental illness due to not only income but also race, insurance status, and level of education. Due to these challenges, patients may delay medical and/or dental care or use hospital emergency departments (EDs) for non-emergent medical issues, leading to increased costs to the healthcare system. This problem is compounded by provider shortages and a lack of providers who accept uninsured or underinsured patients. KC CARE has expanded and adapted to increase accessibility and meet the growing demand in and around Jackson County. We now have three locations in urban Jackson County: our Midtown location on Broadway Blvd, our Northeast location on Independence Avenue, and our Research Medical Campus location on Meyer Blvd and Prospect Avenue. We also partner with Rose Brooks and Cornerstones of Care to provide onsite services for their clients. Access to Oral Health care is a significant barrier for many in Jackson County. Most public and private medical insurance plans do not cover dental services unless supplementary coverage is purchased. Even though children have better coverage through Medicaid, finding providers who accept Medicaid is a challenge. Only about 15% of Jackson County-area dentists accept Medicaid and even fewer see uninsured patients on a sliding scale fee. Missouri KIDS COUNT reported that 40% of Medicaid-eligible children did not access dental services in a calendar year. Missouri ranked 41st in the county for the number of residents who saw a dentist during the 2016 calendar year. Oral health is systematic and impacts overall health and wellbeing in children and adults. KC CARE staff care for the whole person, reducing ED visits and increasing quality of life and self-esteem through high-quality Oral Health care. Like the Primary Care program, the KC CARE's Oral Health program has been a core service since 1971. We strive to accommodate as much of the high demand for dental services as possible. KC CARE's 2015 recognition as a Patient-Centered Medical Home (PCMH) and designation as a Federally Qualified Health Center (FQHC) continue to bolster the foundation of our services. Under the PCMH model, each patient has a primary care physician to lead a team of healthcare providers within an integrated system of care and wellness, covering patients' medical, behavioral health, and oral health needs. The ultimate goals of PCMH are improving both the overall health of patients and patient satisfaction with the healthcare system as a whole. The model focuses on accessibility, patient involvement, individualized treatment plans, and appropriate referrals, follow-up, and evaluation of effectiveness. The FQHC designation from HRSA further signifies KC CARE's excellence in care and helps us expand our services to all individuals, from children to seniors. Both the PCMH and FQHC designations reflect the vital role KC CARE serves in the Jackson County community and beyond.

Describe target population to be served: KC CARE Health Center provides medical care for our community's most vulnerable and marginalized populations. During the 2017-18 fiscal year, our staff provider Primary Care services to 8,229 unduplicated individuals in over 17,000 encounters. 75% of Primary Care patients live at or below 100% of the Federal Poverty Level (FPL) and an additional 14% live between 100% and 200% of the FPL. 48% of patients were members of ethnic or racial minority groups. 52% of patients were female, 46% are male, and 1% self-identified as transgender or gender queer. 66% of Primary Care patients in 2017-18 were uninsured and 18% were underinsured. The majority of patients resided in Jackson County, Missouri. Our patients also have complex health needs, with over 60% diagnosed with one or more chronic conditions such as hypertension, HIV, or obesity. The most common diagnoses were hypertension, diabetes, hyperlipidemia, and musculoskeletal pain. KC CARE's Oral Health program served 1,479 unduplicated individuals in the 2017-18 fiscal year through more than 2,200 encounters. Of this population, 75% live at or below 100% FPL and an additional 20% live between 100% and 200% FPL. 54% of Oral Health patients were members of ethnic or racial minority groups, 58% were female, and 41% were male.

What are the qualifications for participants: KC CARE Health Center provides services to anyone at our door. No one is ever turned away due to insurance status or ability to pay. We ask patients to provide information on their residence, income, and insurance status. Many services require appointments, although walk-in patients are accommodated when possible and appropriate. Receiving FQHC designation allowed us to expand our services to youth and as such, KC CARE serves people from all walks of life.
