Presentation by Jackson County Health Department (Jackson County Public Health)

Members of Jackson County Health Department (Jackson County Public Health) will address the Health & Environment Committee to share updates on emerging public health trends, challenges, threats, and opportunities. This effort is to ensure the committee has the most current information available to guide policy discussions and decision-making.

In the future, this time will also give a structured space to follow up on any data requests or topics the committee wishes to explore in greater depth-allowing the Health Department to respond more quickly and effectively to work more closely with the County Legislature in advancing the health and well-being of our community.
