Narrative

On September 17th 2024 at 0800 hours I was dispatched to Landahl Maintenance area in report of a tractor and Flex Mower being stolen from the maintenance area.

I arrived on scene at approximately 0831 hours and met with maintenance workers Kat Bauer, Dan Farmer, and Frank Fisher, to gather information of the incident.

Mr. Farmer informed me that he and Mr. Fisher arrived to the are at approximately 0750 hours and noticed that the tractor, a John Deere 7200, and a John Deere Flex Mower were missing from the area. Mr. Farmer immediately called Kat Bauer to inform her of the situation and she afterwards called and informed the rangers. Mr. Farmer stated that the tractor and the flex mower were both in the area on September 13th and both must have been stolen over the weekend.

After gathering this information I when sent an email to Monica Litchi requesting more information about both pieces of equipment. I left the area at 0908 hours.

A local farmer named Rick R. Wooderson sent me an email on 09/18/24 stating that he had friends living in the area that had seen the tractor leaving the area at approximately 1800 hours on 09/14/2024.

Monica Litchi had sent me an email with more information on both pieces of equipment stolen, the paperwork for the equipment has been attached to the report. Ms. Litchi had also stated that a John Deere tractor equivalent today for replacement would cost approximately \$89,000, and the Flex Mower replacement would cost approximately \$25,500.
