RE: Term and Supply Recommendation - Ace Pipe Cleaning

Ladies,

The Department of Public Works is requesting that the Department of Purchasing recognize the existing government contract held by the City of Kansas City, Missouri and employ Ace Pipe Cleaning as a term and supply vendor. We believe that having Ace Pipe Cleaning on term and supply could provide a substantial benefit to the Department of Public Works and the County. We estimate that an annual total of \$70,000 would be sufficient in completing the tasks necessary by this vendor. The funds for these services will be allocated from Other Contractual Services within the Public Works Road and Bridge Maintenance account code, 004-1506-6790.

Thank you for your consideration with the above term and supply recommendation.

Professionally,

Brian Gaddie, P.E.  
Director of Public Works

MECHANICAL WORK (HOT TAPS, HYDRANT CONNECTIONS, VALVE CONNECTIONS) WILL BE PROVIDED BY THE OWNER ACE CAN PROVIDE THESE SERVICES AS ADDITIONAL SERVICES PER NEGOTIATED PRICING.			

**Project Preparation-Water Main Inspections, KCMO Water Services**

Prior to mobilization of the field work, a site visit between KCMO Water Services staff and a representative from the Ace Pipe Cleaning project team will be scheduled to formulate the required details of the inspection plan. The purpose of this visit is to review the site conditions, the operating parameters and important information concerning the pipeline to be inspected, and the necessary coordination required for a successful leak detection and CCTV inspection.

Prior to the field inspection, APC requires the following information and/or confirmation to develop the appropriate project management and planning. Unless otherwise negotiated OWNER will provide:

- Provide 2-inch taps for direct main tool insertion inspection.
- Provide hydrant specifications, make and model, for hydrant insertion inspection.
- Provide additional information regarding the distribution system, but not limited to, plan and profile drawings, lay sheets, shop drawings, manufacturing details, details of access structures, air valves, blow-offs, and main line valves.
- Provide operating flow and pressure data for the inspection locations. The .07 tools have optimum pipeline flow velocities and internal pressures for inspection purposes.
- Verify that any sidelines can be isolated for the inspection period to prevent the inspection equipment from navigating into the incorrect pipeline.
- Verify that there are no butterfly valves within the portion of the pipelines to be inspected.
- Provide any required legal right-of-entry on the property.
- Provide operational personnel during the inspection as necessary to provide access and pipeline operational control.
- Provide any excavation access necessary to the pipeline or operations support for things such as de-watering, excavation shore up, and/or civil activity as necessary such as tapping. APC can provide these civil works support, but this scope is not covered in this pricing proposal.
- Provide any additional staffed traffic control required in high traffic areas.
