Re: Aumentum Technologies (Thomas Reuters – dba Manatron, Inc.) Annual
Software Maintenance

We have entered e-RLA #26-076 for 2026 annual software maintenance for Aumentum Technologies (Thomson Reuters –dba Manatron, Inc.) for tax software used by the Department of Collection. Aumentum was originally purchased in 2022 through the competitive bid process and was finally implemented in 2025.

Since only Aumentum can provide support & maintenance for its own proprietary Aumentum tax software, we are requesting a sole source purchase per County Code Chapter 10 Section 1030.1. Please see the attached invoice for breakdown of \$642,563.00 charge. Funding has been budgeted for 2026 in fund/account: 001-1403-56662-26. Also attached is their Certificate of Compliance for 2026.
