

Additional comments from Independence Deputy Chief Jason Petersen:

The following projects were identified as needed for the security, resilience, and redundancy necessary in systems necessary for emergency operations;

S8 Upgrade at four tower sites migrates access control from obsolete Millennium system to S8;

Replace obsolete original consoles in ECC with five new Motorola complete Dispatch consoles; This allows for upgrades and interoperability that is not attainable with the current equipment;

Back up site needs that include consolettes, desktop computers, and accessories;

Fiber project that provides a permanent solution to weather-related radio degradation and connection to KCPD radio and network for back up site;

Dispatch building and training equipment needs that include wireless headset bases and 80 chairs;

Auto alert for Fire dispatching;

These projects total P435,400. There will be some variance due to the need for more specific quotes or RFP in some areas;
